Office Action Summary	Application No. 09/600,209	Applicant(s) NEILSON, BRAD	
	Examiner STEVEN M. MARSH	Art Unit 3632	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is the fourth office action for U.S. Application 09/600,209 for a Material Support Stand filed by Brad Neilson on July 12, 2000. Claims 4-9, 11, and 13 are pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4-9 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 4,007,841 to Seipel. Seipel discloses an equipment support stand that can be used on an underground mining machine adjacent to an apparatus. The stand has a base (13, 14) adapted to stand on the surface of a machine, and an upstanding rack (10) shaped and configured to hold or support items, mounted to the base. There is a plurality of clamps (34', 35') for releasably securing the base to the surface, the clamps having a hook formation (formed by the lower end of 35' in conjunction with 34') adapted to pass through an aperture in the surface of a machine and hook beneath the surface to rigidly fix the stand to the surface. The upstanding rack has a frame with arms (22) projecting laterally therefrom to at least one side thereof, wherein items can be held in position by the arms. At least a pair of arms is aligned generally side by side with each other and defining a space there

between in which items can be located and the stand is adapted to be coupled back to back with another stand to provide for double storage capacity with access from at least two sides. There are pegs (23) projecting upwardly at an inclined angle to the horizontal, the pegs being adapted to support annular items or items that have holes or bores there through. The hook formation is tensionable by an over center locking lever (37) connected thereto which, when tensioned, will tightly clamp the stand to the surface. Claims 4-9, 11, and 13 contain limitations to the mining machine, apparatus on the mining machine, and the interchangeable items. However, those features are not positively recited in the claims and therefore carry no patentable significance.

Allowable Subject Matter

Claim 13 is allowed.

Response to Arguments

Applicant's arguments filed December 11, 2007 have been fully considered but they are not persuasive with respect to claims 4-9 and 11. Applicant's argument rely on the hook with respect to the aperture of the machine. However, the machine is not positively recited in the claim. The hook need only be capable of performing the function on any machine to meet the limitation.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
